ISCED field

Field
Naravoslovje, matematika in statistika

ISCED subfield

subfield interdisciplinarne izobraževalne aktivnosti/izidi, pretežno naravoslovje, matematika in statistika

Qualification level

SQF 7
EQF 6
First level

Learning outcomes

The qualification holder will be able to:

- demonstrate understanding of the functioning of the human organism in interaction with the living environment,
- recognise consequences of the interaction of the environment and human beings,
- undertake preventive operations, design and lead exercise/sports programmes and promote an active lifestyle as a factor of quality of life with the aim of sustainable development,
- acquire specific knowledge that will enable more efficient functioning of the human organism in interaction with its environment,
- undertake education in and build on various streams of applied knowledge such as education, environmental health, dietetics, etc.,
- work successfully in the field of the promotion of motor efficiency, increasing fitness for work and preventive activities in various living environments.

Assessment and completion

System of assessment:

Students' knowledge is assessed by means of practical exercises and seminar papers, and also via products, projects, performances, services, etc. and by examinations. Examination performance is graded as follows: 10 (excellent); 9 (very good: above-average knowledge but with some mistakes); 8 (very good: solid results); 7 (good); 6 (adequate: knowledge satisfies minimum criteria); 5–1 (inadequate). In order to pass an examination, a candidate must achieve a grade between adequate (6) and excellent (10).

Progression

Students may enrol in a higher year if by the end of the academic year they have met all enrolment requirements defined by the study programme.

Transitions

Second-cycle master's study programmes (SQF level 8)

Condition for obtaining certificate

In order to complete the programme, students must complete all course units prescribed by the study programme and subject syllabuses, and defend a master's thesis in the context of a seminar. In this way students accumulate 180 credits.

Awarding body

University of Primorska, Faculty of Mathematics, Natural Sciences and Information Technologies
