
Doktor znanosti/doktorica znanosti s področja farmacije

Selected qualifications

Name of qualification	Doktor znanosti/doktorica znanosti s področja farmacije
Translated title (no legal status)	Doctor of Philosophy in the field of pharmacy
Type of qualification	Doktorat
Category of qualification	Izobrazba
Type of education	Doctoral education
Duration	3 years
Credits	180 credits

Admission requirements

- Diploma in second-cycle study programmes in the field of biomedicine, biotechnology and mathematical sciences or
- diploma in study programmes intended to provide education for professions regulated by European Union directives (93/16/EEC for doctors, 78/1027/EEC for veterinarians, 78/687/EEC for dentists and 85/432/EEC for pharmacists) and which require at least 300 credits or
- diploma in study programmes leading to a specialisation with previous completion of a first-cycle professional education programme in biomedicine, biotechnology and mathematical sciences; additional study requirements for individual fields totalling 30 to 60 credits determined for candidates by the Biomedicine Programme Council or
- diploma in study programmes leading to a Master of Science or specialisation following the completion of study programmes leading to a university qualification in biomedicine, biotechnology and mathematical sciences; study requirements totalling 60 credits are recognised for candidates or
- diploma in study programmes leading to university qualification in related disciplines in biomedicine, biotechnology and mathematical sciences.

ISCED field

Field
Naravoslovje, matematika in statistika

ISCED subfield

subfield interdisciplinarne izobraževalne aktivnosti/izidi, pretežno naravoslovje, matematika in statistika

Qualification level

SQF 10
EQF 8
Third level

Learning outcomes

The qualification holder is be able to:

- perform creative and independent research,
- solve scientific problems of future employers,
- understand and critically assess solutions for demanding and complex scientific research questions,
- perform creative and independent work on scientific research problems,
- make critical assessments of research results,
- develop new research methods,
- transfer new technologies and knowledge into practice,
- understand all segments of pharmaceutical chemistry on the molecular and macromolecular levels,
- be familiar with the laws of structural and chemical processes that are important to understanding the functioning and planning of active ingredients for treatment,
- have an in-depth knowledge of new materials, technological approaches and pharmaceutical forms.

Assessment and completion

Examination performance is scored as follows: 10 (excellent); 9 (very good: above-average knowledge but with some mistakes); 8 (very good: solid results); 7 (good); 6 (adequate: knowledge satisfies minimum criteria); 5–1 (inadequate). In order to pass an examination, a candidate must achieve a grade between adequate (6) and excellent (10).

Progression

Students may progress to the next year if by the end of the academic year they have met all requirements defined by the study programme for progression to the next year.

Condition for obtaining certificate

The condition for completion of the study programme and acquiring the scientific title of Doctor of Science is the successful completion of all of the study requirements from the programme and a successful oral presentation of their doctoral thesis. Doctoral candidates must publish at least one scientific article in the field of their doctorate in a journal indexed by the SCI or SSCI. The doctoral candidate must be the lead author of the article. The scientific article must be published or accepted for publication before the oral presentation of the doctoral dissertation.

Awarding body

University of Ljubljana Biotechnical Faculty, Faculty of Pharmacy, Faculty of Chemistry and Chemical Technology, Faculty of Medicine, Veterinary Faculty; Jožef Štefan Institute; National Institute of Chemistry; National Institute of Biology
