(general competences)

- demonstrate in-depth understanding of the theoretical concepts of the field its business, economic, legal, sociological and psychological aspects,
- demonstrate thorough understanding and mastery of various research approaches in a scientific field,
- independently develop new knowledge, skills, techniques, practices and materials through research work.
- resolve the most demanding problems by testing and improving known solutions and by developing new solutions,
- make a contribution through original research that extends the frontiers of knowledge and is important at the national and international levels,
- critically analyse, evaluate and synthesise complex ideas,
- participate in critical dialogues,
- manage and promote complex social processes within the professional field,
- show critical and self-critical judgement,
- manage the most complex work systems and scientific research projects from a broad professional and scientific field.
- publicly present and defend scientific studies,
- promote, within academic and professional contexts, the economic and social advancement of the knowledge-based society,
- demonstrate knowledge of research ethics and act in accordance with them,

#### (subject-specific competences)

- demonstrate systematic knowledge and understanding of the theory, theoretical categories, scientific paradigms and development of the field of management,
- demonstrate thorough understanding of quantitative and qualitative research methodologies and apply them appropriately in research in this field,
- demonstrate personal responsibility and put forth largely autonomous initiatives in complex and unforeseen situations in professional and related environments that are linked to education in the broadest and narrower senses in the field in question,
- master new models and concepts, find new solutions and research approaches,
- incorporate the findings of other disciplines into the broader field of management,
- demonstrate critical judgement with regard to the broadest implications of the application of knowledge in specific professional contexts,
- demonstrate understanding of and apply the methods of critical analysis and the development of skills and expertise in the application of knowledge in a specific professional field,
- lead group work and demonstrate mastery of communication within an organisation and outside it,
- take responsibility for managing highly complex business systems and develop the capacity for critical reflection,
- carry out independent, original and publishable research,
- demonstrate cooperative learning and creative communication skills in the research environment, resolve problems and participate in interdisciplinary research teams,
- critically evaluate the situation in the field of social responsibility and ethical leadership and management,
- critically assess modern sustainable development guidelines and trends from the economic, environmental and social points of view and implement them successfully.

## **Assessment and completion**

Examination performance is graded as follows: 10 (excellent); 9 (very good: above-average knowledge but with some mistakes); 8 (very good: solid results); 7 (good); 6 (adequate: knowledge satisfies minimum criteria); 5–1 (inadequate). In order to pass an examination, a candidate must achieve a grade between adequate (6) and excellent (10).

## **Progression**

Students may progress to the second year when they have completed at least 30 credits from first-year course units.

## **Condition for obtaining certificate**

In order to complete their studies, candidates must complete all taught course units (a total of 60 credits) and research requirements (120 credits) in accordance with the adopted study programme, and successfully defend a doctoral dissertation via a public presentation.

## **Awarding body**

University of Primorska, Faculty of Management
