Field
Poslovne in upravne vede, pravo

ISCED subfield

subfield poslovne in upravne vede, podrobneje neopredeljeno

Qualification level

SQF 10
EQF 8
Third level

Learning outcomes

Qualification holders are qualified to:
(general competences)

- identify a given research problem, analyse it and determine possible solutions,
- recognise paradigm shifts and formulate modern innovative concepts and approaches intended to improve the quality of life of individuals, organisations and communities,
- master standard methods, procedures and processes of research work in the field of quality and excellence,
- apply acquired theoretical knowledge in practice,
- demonstrate autonomy in research and technical work,
- demonstrate a commitment to professional ethics,

(subject-specific competences)

- formulate and implement original scientific solutions to given problems and opportunities in the fields of quality and excellence,
- solve in an original way specific research problems in various fields of quality and excellence as well as related disciplines,
- develop new skills in the application of knowledge in their specific research and work area of quality and excellence and related disciplines,
- develop new empirical research methods for quality and excellence and related disciplines (econometric modelling, decision-making theory, empirical marketing research),
- present scientific results obtained in the form of publication in international scientific periodicals.

Assessment and completion

Examination performance is graded as follows: 10 (excellent); 9 (very good: above-average knowledge but with some mistakes); 8 (very good: solid results); 7 (good); 6 (adequate: knowledge satisfies minimum criteria); 5–1 (inadequate). In order to pass an examination, a candidate must achieve a grade between adequate (6) and excellent (10).

Progression

In order to progress from the first to the second year, students must complete at least 30 credits from the first year, select a mentor and possible co-mentor confirmed by the FOŠ senate and submit a doctoral dissertation proposal assessed as appropriate. In order to progress from the second year to the third year, candidates must have completed all first-year course units amounting to 60 credits and individual work from the second year in the amount of 60 credits.

Condition for obtaining certificate

Students must meet all requirements defined by the study programme to complete their studies.
