Learning outcomes

The qualification holder will be able to:
(general competences)

- analyse, synthesise and anticipate solutions and consequences in the general management and business fields,
- use analytical methods, tools and procedures in R&D work in the field of management and business administration,
- show critical thinking and judgement,
- use modern concepts from the business administration field (above all understanding the functioning of organisations at the strategic and business levels, familiarity with the principles that regulate the functioning of the business environment, basics of company management) in order to identify and address problems at the level of the company and broader society,
- apply theoretical knowledge and actual cases,
- demonstrate knowledge, motivation and skills that ensure preparation for a career in the practical business world in the most demanding professional, research/analytical and management positions in various segments of the business sector and public administration,
- demonstrate autonomy and initiative at work, a capacity for lifelong learning and the ability to adapt to new conditions,
- develop communication and leadership skills and work in multidisciplinary groups at all levels of the organisation,
- work in an international environment,
- make effective use of communication and information resources,

(subject-specific competences)

- demonstrate familiarity with and understanding of the foundations and history of the general management and business fields covered by the programme,
- place and apply new information and different interpretations in the context of management and business studies,

- demonstrate understanding of the general structure of management and business and the connections between different business fields,
- use modern concepts, theories and analytical tools to resolve practical problems and critically evaluate and apply these concepts, theories and tools in a specific business field,
- develop the skills necessary to address specific problems in the field of the chosen business function,
- independently solve the complex problems of a specific business field,
- pursue autonomous business and research work in the field of business functions,
- incorporate knowledge from an individual elective discipline into business decisions,
- identify business opportunities and develop appropriate strategies for their realisation,
- use individual approaches in professional and research work with the support of modern information and communications technology in all areas of general management and the fields of individual business functions.

Assessment and completion

Examination performance is graded as follows: 10 (excellent); 9 (very good: above-average knowledge but with some mistakes); 8 (very good: solid results); 7 (good); 6 (adequate: knowledge satisfies minimum criteria); 5-1 (inadequate). In order to pass an examination, a candidate must achieve a grade between adequate (6) and excellent (10).

Progression

Students may progress to the next year if by the end of the academic year they have completed all requirements defined by the study programme for progression to the next year.
