Selected qualifications

Magister promocije zdravja/magistrica promocije zdravja 

Name of qualification	Magister promocije zdravja/magistrica promocije zdravja
Translated title (no legal status)	Master of Arts of health promotion
Type of qualification	Diploma druge stopnje
Category of qualification	Izobrazba
Type of education	Master's education
Duration	2 years
Credits	120 credits

Admission requirements

The conditions for enrollment in the first year are:

- diploma of a first-cycle higher education study programme in the field of nursing (in the amount of 180 ECTS credits),
- diploma of a higher education study programme in the field of nursing before the amendment to the Higher Education Act (Official Gazette, RS, No. 101/04),
- diploma of a higher education study programme of the first level from other professional fields or diploma of a higher education study programme before the amendment to the ZViS (Official Gazette, RS, No. 101/04):

- medicine, social sciences, humanities, social and business sciences (in the range of 180 ECTS credits or more).

Individuals who are already involved in work environments and have the necessary knowledge and experience (individuals already working in the field of health planning and education, care workers, teachers, managers in companies, volunteers) will also be able to enroll in the study programme. The list of competences provided by the programme will provide students with quality knowledge from a variety of fields. The selection of candidates for study will be based on academic achievement and professional experience. In addition to the above, there will be additional elements of assessment for the admission of candidates to the study programme:

- the scope and quality of the candidate's existing knowledge,
- the extent and quality of the candidate's existing experience,
- securing a place and career development in the field of health promotion,
- ensuring the heterogeneity of health promotion students,
- ensuring an optimal ratio between the number of students and the capacity of the faculty.

Students of other fields of study must pass a differential exam in the amount of up to 10 ECTS in the field of missing subjects (basic knowledge of human activity in the period of health and disease), which will be determined at the individual level at the Commission for Study and Student Affairs and the FZJ Senate. The student takes differential exams during their studies and they are not conditions for enrollment in the programme.

ISCED field

Field
Zdravstvo in socialna varnost

ISCED subfield

subfield interdisciplinarne izobraževalne aktivosti/zidi, pretežno zdravstvo in socialna varnost

Qualification level

SQF 8
EQF 7
Second level

Learning outcomes

The qualification holder will be able to:

General competences:

- ability to think critically, analytically and synthetically,
- ability to define, understand and creatively solve professional problems,
- ability to evaluate one's own knowledge and achievements and to deepen and disseminate one's knowledge,
- ability to adapt to new situations in order to improve quality,
- information management skills (information management),
- compliance with social, functional and economic principles,
- ability to make professional decisions and take responsibility for them,
- ability for independent and team work,
- ability of ethical reflection,
- ability to plan, interdisciplinary coordinate and evaluate health education from the point of view of health promotion,
- ability to provide support as consultants in various sectors,
- the ability to generate and maintain continuous improvement in the quality of services and systems,
- ability to coordinate multidisciplinary research projects with the aim of analyzing and assessing health needs in accordance with further planning for the development of the field,
- understanding the importance of the European dimension in the planning and evaluation of education,
- knows and uses appropriate methods of research and development of own practice,
- knows basic research methods,
- is able to take responsibility for their own professional development and learning through evaluation and reflection of their own work (experiential learning, intervision, supervision),
- knows how to establish a partnership with users and other groups,
- develops new knowledge and understanding of the field,
- acts in accordance with ethical norms and the professional code,
