
Magister znanosti/magistrica znanosti s področja prometne vede

Selected qualifications

Name of qualification	Magister znanosti/magistrica znanosti s področja prometne vede
Translated title (no legal status)	Master of Philosophy in the field of transport studies
Type of qualification	Magisterij znanosti/umetnosti
Category of qualification	Izobrazba
Type of education	Master's education
Duration	2 years
Credits	120 credits
Admission requirements	<ul style="list-style-type: none">• Enrolment in the programme is also open to candidates who hold an academic bachelor's degree or a professional bachelor's degree in any field under the conditions laid down by the Higher Education Act and who are proficient in English.

ISCED field

Field
Transport, varnost, gostinstvo in turizem, osebne storitve

ISCED subfield

subfield transport

Qualification level

SQF 9
EQF 8
Third level

Learning outcomes

Qualification holders are capable of leading development institutions and other development groups in transport companies, insurance companies and in the specialised services of relevant ministries or at a chamber of commerce.

Students of this postgraduate programme can continue their studies in a doctoral programme and become research fellows at the Faculty of Maritime Studies and Transport or leading researchers at related institutions.

Assessment and completion

Students' knowledge is assessed by means of practical exercises and seminar papers, and also via products, projects, performances, services, etc. and by examinations. Examination performance is scored as follows: 10 (excellent); 9 (very good: above-average knowledge but with some mistakes); 8 (very good: solid results); 7 (good); 6 (adequate: knowledge satisfies minimum criteria); 5–1 (inadequate). In order to pass an examination, a candidate must achieve a grade between adequate (6) and excellent (10).

Progression

The programme consists of an integrated set of compulsory subjects, several elective subjects and orientation subjects, of which the candidate chooses at most one. The candidate chooses selective and orientation subjects in agreement with the supervisor. Elective and orientation subjects are the basis for research in the master's thesis or doctoral dissertation. Students select a combination of subjects in order to reach a total of at least 120 credits (90 credits from subjects and 30 credits from the master's thesis). Subjects consist of lectures or seminars and individual work by candidates. As a rule, lectures only cover an introduction to the topic and a review of relevant literature, which students then work on individually. Individual research by the student accounts for 25% of course units (i.e. 30 credits) in the form of a master's thesis. With the agreement of the Faculty senate, students may obtain a maximum of 10 credits from the group of compulsory or elective subjects by passing examinations at another higher education institution at home or abroad.

Students may enrol in second-year subjects once they have completed at least 45 credits or covered at

least 200 hours of seminars and lectures via examinations and seminars.

Transitions

Third-cycle doctoral study programme (SQF level 10)

Condition for obtaining certificate

Students complete their studies when they have successfully met all prescribed requirements of a study programme. Graduates of this programme must complete the programme by the 30.9.2016.

Awarding body

Faculty of Maritime Studies and Transport, University of Ljubljana
