Learning outcomes

A master craftsman:

- organise and manage the work process
- assure the quality of products and services
- prepare a business plan and analyse the results of work
- receive customers and provide advice
- manage the purchase and sale of products or services
- operate a business rationally and economically (staff, standards and calculation of services)
- draft proposals for the rewarding of co-workers and work to ensure a positive working atmosphere
- take on workers and plan their development
- implement environmental regulations and regulations on safety at work, fire safety and environmental protection
- transfer knowledge, skills, experience and new developments in the profession to apprentices, students and co-workers.
- Highly complex vehicle electrician work at master technician level:
- undertake complex diagnosis of electrical devices and electronic starter and injection systems in motor vehicles
- troubleshoot with the help of measuring instruments
- overhaul vehicle electrical systems, repair electric generators, set up and assemble acoustic devices and other vehicle equipment
- take more complex electrotechnical and technological measurements
- accept vehicles, spare parts, assemblies
- keep abreast of new developments in vehicle technology.

Accessors

Members of examination boards for each examination unit separately. Appointed by the minister responsible for education. Appointment may be renewed every 4 years.

Assessment and completion

Candidates sit a master craftsman examination, which consists of four units:

- a practical unit,
- a specialised theoretical unit,
- a business management and economics unit, and
- a teaching/instruction unit

Condition for obtaining certificate

In order to obtain the title of master craftsman, candidates must pass all (four) units of the master craftsman examination.
