- communicate with clients, external collaborators, colleagues and government agencies
- take care of their own safety, health at work and the environment, and fire safety in accordance with regulations and internal rules

Accessors

Verification and assessment are carried out by committees for the verification and validation of national vocational qualifications, appointed by the National Examination Centre (NEC). Committee members must be licensed by the National Examination Centre. Licences may be found here .

Assessment and completion

VALIDATION

During the guidance process the candidate prepares a portfolio, which is assessed by a committee. If the portfolio submitted by the candidate contains authentic, valid and adequate proof of the knowledge, skills and competences defined in the occupational standard, the committee may:

- validate the contents of the occupational standard in full,
- validate the contents of the occupational standard in part and define the knowledge, skills and competence to be verified,
- refuse to validate any of the contents of the occupational standard because the candidate has not provided proof of any of the knowledge, skills and competences defined in the occupational standard, in which case it will verify the occupational standard in full.

VERIFICATION METHOD

- written examination

- practical examination with oral defense

The Commission determines the practical task from the content of the catalog, ie. preparation of the design of project documentation for the protection of the selected facility.
The types of practical tasks are defined in point 11 of the catalog and can be: preparation of design documentation for security of a financial institution or preparation of design documentation for protection of combustible material storage (type of facility classified as critical infrastructure is determined by the commission) or preparation of design documentation for security facility where hazardous waste is collected and treated (the type of facility is determined by the commission).
The candidate brings the completed practical task for direct examination.

Condition for obtaining certificate

Kandidat dokaže, da dosega znanja, spretnosti in kompetence, določene v katalogu standardov strokovnih znanj in spretnosti.

Awarding body

Providers of procedures for identifying and validating NVQs are entered in a register of providers maintained in the collection of the national information centre for vocational qualifications. These are: vocational schools, businesses, B2B training centres, adult education centres and chambers of commerce.
