Learning outcomes

The candidate is able to:

- independently plan, prepare, implement and control one's own work in accordance with work quality standards in the pharmaceutical industry,
- sterilize material and semi-finished products, prepare solutions for injection/infusion, fill sterile pharmaceutical forms and carry out optical inspection of filled units,
- weigh in accordance with regulations, produce solid pharmaceutical forms: granules, mixtures, tablets, capsules, film-coated tablets,
- prepare and fill semi-solid pharmaceutical forms, suppositories and vaginal globules and prepare liquid non-sterile pharmaceutical forms,
- prepare OVO for use in sterile and non-sterile production,
- pack products,
- independently carry out temporary storage of raw materials, packaging and semi-finished products and take care of material flows between warehouses and production,
- independently carry out cleaning and disinfection of production and auxiliary premises,
- when implementing the process, fill out the production documentation responsibly and accurately, which ensures that all prescribed parameters are recorded during the work and check for possible deviations of the actual parameters from the prescribed ones,
- in their work, constantly observe and ensure work with the guidelines of good production and good storage practices in pharmaceutical production,
- maintain personal hygiene and workplace cleanliness,
- take care of the used equipment from the point of view of monitoring, carrying out reassembly, minor maintenance and final cleaning, which ensures the smooth operation of production,
- communicate with superiors and colleagues and observe business ethics and company values,

properly and safely implement measures that ensure an acceptable level of risk for the occurrence of health problems and the occurrence of fire or explosion when performing work, and perform work in such a way that the amount of waste is as small as possible and the resulting waste is sorted in accordance with regulations.

Accessors

Verification and assessment are carried out by committees for the verification and validation of national vocational qualifications, appointed by the National Examination Centre (NEC). Committee members must be licensed by the National Examination Centre. Licences may be found here .

Assessment and completion

1.VALIDATION

During the guidance process the candidate prepares a portfolio, which is assessed by a committee. If the portfolio submitted by the candidate contains authentic, valid and adequate proof of the knowledge, skills and competences defined in the occupational standard, the committee may:

- validate the contents of the occupational standard in full,

- validate the contents of the occupational standard in part and define the knowledge, skills and competence to be verified,
- refuse to validate any of the contents of the occupational standard because the candidate has not provided proof of any of the knowledge, skills and competences defined in the occupational standard, in which case it will verify the occupational standard in full.

2.METHOD OF VERIFICATION

- Practical verification with an oral presentation.

Condition for obtaining certificate

The candidate demonstrates that he/she achieves the knowledge, skills and competencies specified in the catalogue of professional knowledge and skills standards.

Awarding body

Providers of procedures for identifying and validating NVQs are entered in a register of providers maintained in the collection of the national information centre for vocational qualifications. These are: vocational schools, businesses, B2B training centres, adult education centres and chambers of commerce.
