- is educated for sustainable development and active participation in democratic society, which includes self-knowledge and a responsible attitude towards the self, own health, other people, own and other cultures, the natural and social environment, future generations;
- develops a spirit of enterprise, innovation, creativity.

Assessment and completion

In the first triad (years 1-3) of elementary school, students' knowledge is assessed using descriptive assessments. In the second triad (years 4-6) and third triad (years 7-9) of elementary school, students' knowledge is assessed using numerical grades.

National assessment

At the end of the second and third triads, students' knowledge is tested by means of national assessment, which is designed to verify the standards of knowledge set out in the curriculum. The results of national assessment serve as additional information on students' knowledge.

At the end of the second triad, national assessment is voluntary for students; testing covers the mother tongue (Slovene, Hungarian, Italian), mathematics and a foreign language. At the end of the third triad assessment is compulsory for all students; testing covers the mother tongue (Slovene, Hungarian, Italian), mathematics and a third subject.

Progression

Students in the first and second triads do not repeat years. Third-triad students progress to the next year if they achieve a positive assessment in all subjects at the end of the academic year.

Transitions

lower vocational education (SQF, level 3), secondary vocational education (SQF, level 4), technical and general secondary education (SQF, level 5)

Condition for obtaining certificate

Basic schools issue certificates to students at the end of each year. The certificate is a public document.

Basic schools issue school leaving certificates to students who complete basic education. The basic school leaving certificate contains the student's year 9 grades and the student's results from national assessment at the end of the third triad.

Awarding body

- Basic school
- Education centres for children with special needs
- Adult education centre

(home education possible)
